

Dynamic UI → class  
 static UI → functional

hooks → launch  
 ↳ powers

use functions that let you 'hook into' React state & lifecycle methods from functional comp.

Hooks do not work in class component

Comp {  
 componentDidMount → side effects  
 componentDidUpdate  
 componentWillUnmount

hooks  
 ↳ manifest → functional

- 1) state
- 2) LCM

dynamic

dynamic

1) useState

State & LCM of React using FC

useEffect()  
 ↳ ??

- 1) ✓
- 2)
- 3)

## functional components ?

1) boilerplate class constructor, super()  
 this.state = {}

2) arrow functions, this handle .bind  
 ↳ this parent ✓

3) separation of logic → data state  
UI logic

- 1) state → useState ✓
- 2) LCM → useEffect ✓
