

- Types
- 1) Pageation is it
  - 2) Life cycle Methods React
  - 3) API data start

- 1) move → unique id
  - 2) moveEnter hook. id ✓ render()
  - 3) moveLeave hook. ~ ?
- API
- 

Life cycle Methods (class Components)

- 1) constructor()
  - 2) render()
- what? what? update

API

Side effect data start

→ time taking

e.g API call on data start

all of this work is done in render() → ComponentDidMount() → API

- 1) what render(), DOM ✓ what?
- 2) API → CDM() state changes

render() → DOM → API → DOM

axios

↳ library from

tool

↳ API

↳ new data at help
